SUMMARY

Highly disciplined, responsible, and proactive Software Development student with a strong sense of teamwork and respect, committed to professional and personal growth while actively contributing to the organization's success.

WORK EXPERIENCE

Web Administrator | Acuática May 2025

– Developed and managed the administration platform.

Bartender & Customer Service | Rincón de Maní 2021 - Present

- Managed customer relations, inventory control, and fast-paced environment operations.
- Developed communication and customer service skills in a high-demand environment.
- Efficiently managed multiple tasks under pressure, optimizing service times.
- Teamwork capacity and adaptability, contributing to the restaurant's operational flow.

PROJECTS

Acuática May Platform 2025

Django-based web system for client and membership management, featuring automated license-plate access, real-time validation, anti-passback security, and a comprehensive admin dashboard.

Pokemon Battle Simulator 2025

Java-based command-line Pokémon battle simulator implementing Object-Oriented Programming (OOP) principles, featuring a custom combat system, AI opponent, Pokedex management, and CSV-based data persistence.

OverLoad 2025

C#-based web application developed with ASP.NET Core MVC and Entity Framework Core for workout tracking, featuring exercise library management, progress logging, and user authentication.

EDUCATION

2025 - Present	Software Engineering Undergraduate Student at Tecnológico de Software Focus on software development, algorithms, and data structures Relevant coursework: Object-Oriented Programming, Databases, Artificial Intelligence Development of practical projects in Java and Python
2022 - 2025	High School Diploma at Universidad Autónoma de Yucatán Specialization in Mathematics and Programming (Prepa 1) Terminal stage in software development and information technologies Propaedeutic training with a scientific-technological and mathematical focus

SKILLS & CERTIFICATIONS

Languages	Spanish (Native) English (Intermediate B1/B2)
Technical Skills	Java C# Python .NET Framework SQL Web Design Unity Bash Git/GitHub Linux Environments VS Code AutoCAD Microsoft Office
Certifications	Software Architecture (Académica) Intermediate SQL (DataCamp) Data Structures and Algorithms in Python (DataCamp) Network Technician Career Path (Cisco Networking Academy) Responsive Web Design (HTML5) (freeCodeCamp)
Milestones	Invent For The Planet (Project: Aura) Global Game Jam (Participant)
Soft Skills & More	Team Leadership Continuous Learning Problem Solving Self-taught and proactive in learning new technologies Focus on logical problem solving Committed to code quality and best practices Interpersonal skills developed in diverse work environments IEEE Student Member (2025 - Present)
Tech Interests	Artificial Intelligence Machine Learning Video Game Development Robotics Cyber-security Open Source Software
